Description

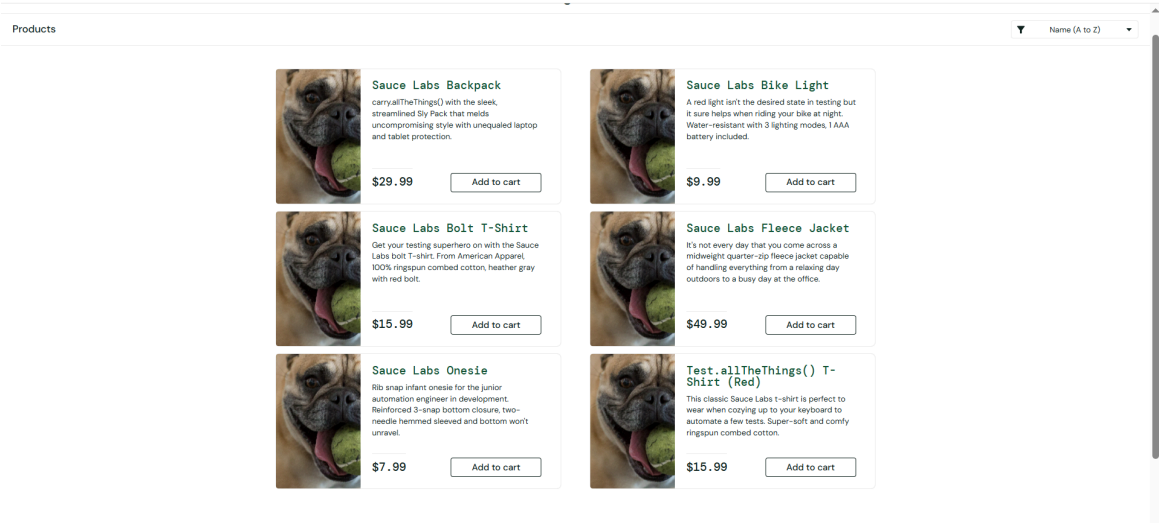

Precondition: User is logged in as "problem_user" and is on the inventory page (<https://www.saucedemo.com/inventory.html>).

Steps to Reproduce:

1. Observe the product images on the inventory page

Actual Result: All 6 products display the same image (a dog holding a ball / "404" placeholder) instead of their own product photo. Affected products:

- Sauce Labs Backpack
- Sauce Labs Bike Light
- Sauce Labs Bolt T-Shirt
- Sauce Labs Fleece Jacket
- Sauce Labs Onesie
- Test.allTheThings() T-Shirt (Red)

Expected Result: Each product displays its own correct product image, matching the images shown for "standard_user".

Severity: Low — purely visual; nothing crashes, no data is lost, and the user can still browse and purchase.

Priority: High — the customer cannot see what the product actually looks like before buying, which damages trust and can reduce conversions across the entire catalogue.

Environment: Chrome 148.0.7778.217 / Windows 10 / user: problem_user
