Description

Precondition: User is logged in as "problem_user" on the inventory page.

Steps to Reproduce:

1. Open the sort dropdown (top-right)

2. Select each option in turn: "Name (Z to A)", "Price (low to high)", "Price (high to low)"

Actual Result: The product order does not change for any sort option.

Expected Result: The product list re-orders according to the selected option, as it does for "standard_user".

Severity: Medium — a feature is broken, but the user can still browse and buy (workaround: scroll manually); nothing crashes.

Priority: Medium — sorting is a convenience that aids product discovery.

Environment: Chrome 148.0.7778.217 / Windows 10 / user: problem_user
