Description

Precondition: User is logged in as "problem_user" with at least one item in the cart.

Steps to Reproduce:

- 1. Add a product to the cart
- 2. Open the cart (top-right icon)
- 3. Click "Remove" on the item

Actual Result: On the inventory page the "Remove" button does not respond; the item stays in the cart and the badge does not decrease. (Removing the same item from the Cart page works — this is a workaround.)

Severity: Medium — a feature is broken, but a workaround exists (remove from the Cart page).

Priority: High — affects normal cart management on the main shopping screen.

Environment: Chrome 148.0.7778.217 / Windows 10 / user: problem_user
